## About us

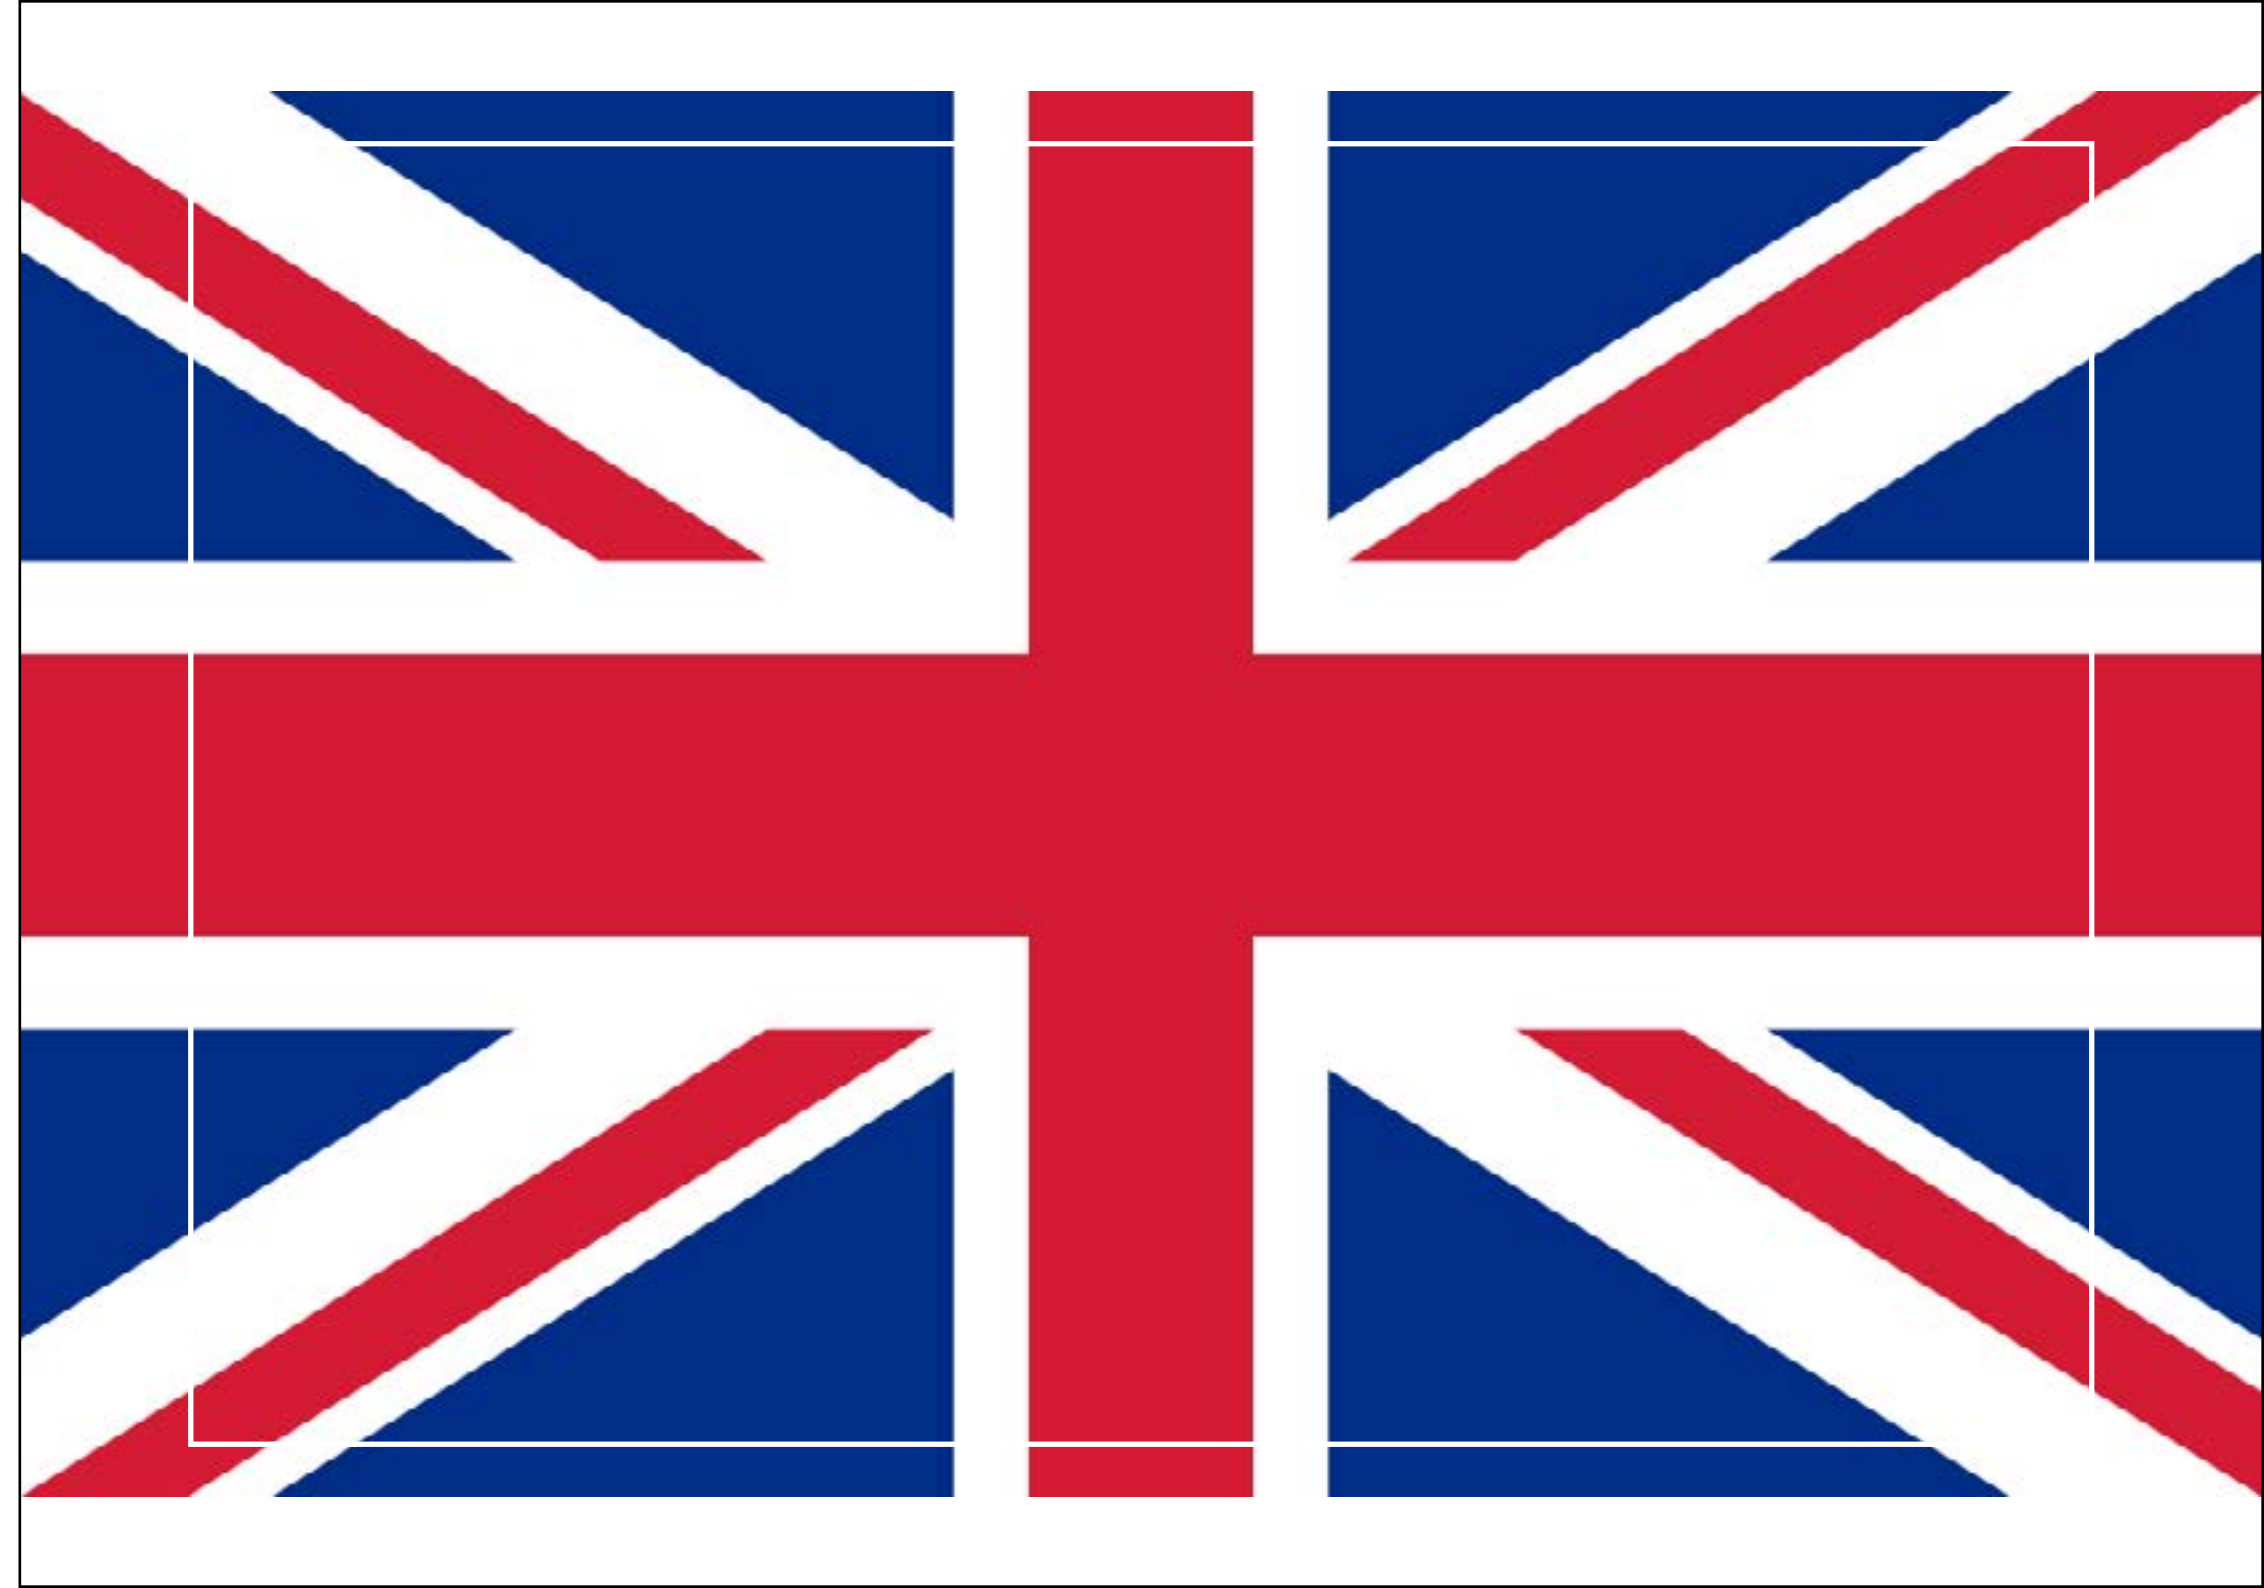

Steven Andrews Bespoke was incorporated in 2016. with a vision to help people fullfil there home interior dreams by offering a design service without limit thus opening the door to creativity and inspirational design possibilities.

Working closely with architects, builders, suppliers, craftsmen, and installation experts, clients are able to take advantage of a wealth of knowlegde across many sectors but all with a common interest. Boasting a turn key solution so that project management is taken care of, leaving you to rest assured that all aspects of the project are in hand.

## British made

Working with local industry is at the centre of Steven Andrews Bespoke's ethos. Timber is sourced directly from our local suppliers and if it's important to you we can even track the material right back to the very tree that was grown to produce it. Both FSC & PEFC sustainability is of the highest importance.

When outsourcing and importing is so prevalent commissioning our cabinet makers ensures that production of your furniture from start to finish is done only here in Great Britain.

## Bespoke

Kitchens, Bathrooms, Bedrooms, Studies , Tables or Chairs.

We produce furniture to any design and size using the materials you desire. Whether you're looking to create a traditional, classic or contemporary design we can work with you to create inspiring solutions for your home. Our pieces are handcrafted in UK based workshops using traditional techniques resulting in furniture that is not only unique but will also last a lifetime.

Real wood Veneered  
MDF

Veneered  
MDF offers  
beauty with  
value and  
varsatility

Melemine Faced  
Plywood

Melamine coating is a  
hard durable surface that  
adds a crisp look to any  
project. With plywood un-

ity for a classic  
look that will

## Materials

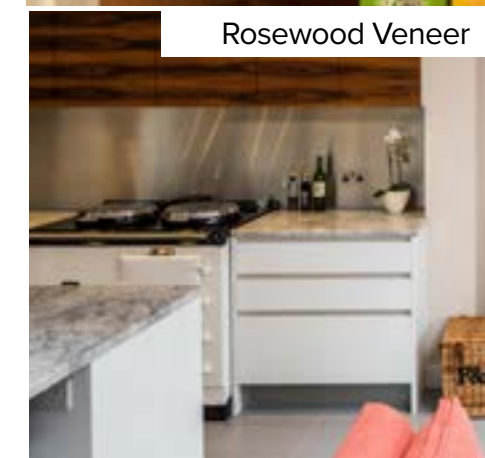

Our aim when manufacturing is to construct highly durable, beautiful pieces that age like furniture used to. Guiding you though the many options, we will help you discover the right choice for your project and will succesfully marry the right materials, construction technique and your budget to acheive the best cabinetry for your home.

## Hardwood Timber

Rustic Raw Timber

Spray Lacquered  
Birch Plywood

Bookmatched real wood-  
Veneer

Spray Lacquered solid  
hardwood

## Painted

Spray painted primer

Off site hand painted

Spray painted gloss

On site hand painted

## Finishes

We are committed to achieving the right look and feel for your project. Choose any surface finish from the popular hand painted or spray finished treatments. If you're not sure what finish you would like then we can arrange for samples to be produced just for you, ensuring you're 100% certain that your cabinets will be delivered just the way you want them.

## Storage

You can't have storage without shelving or drawers in one form or another. These details are what give your furniture functionality so we treat them with the same importance as the rest of your cabinetry, ensuring no detail is overlooked when designing and building your project.

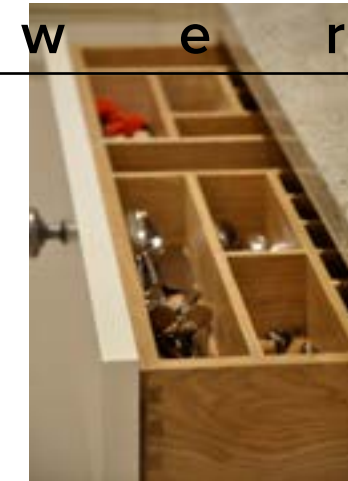

## S h e l v i n g

It's not 'just shelving' when its bespoke. Choose from painted, veneered, solid timber, glazed or if you have your own innovative idea then it's highly probable that we can help.

## D r a w e r s

Possibly the most desirable storage device, especially in most modern kitchens. Whether it's softclose or hardwood you're looking for we can offer a wide range of options one of which is sure to be right for your needs.

## Cabinet construction

Lay-on bespoke shaker door

Biscuit jointing birch plywood cabinets

Cabinet frames

Contemporary shelving

Shaker doors

Finger jointed drawerbox construction

Bespoke tables and worktops

Tenonned frames

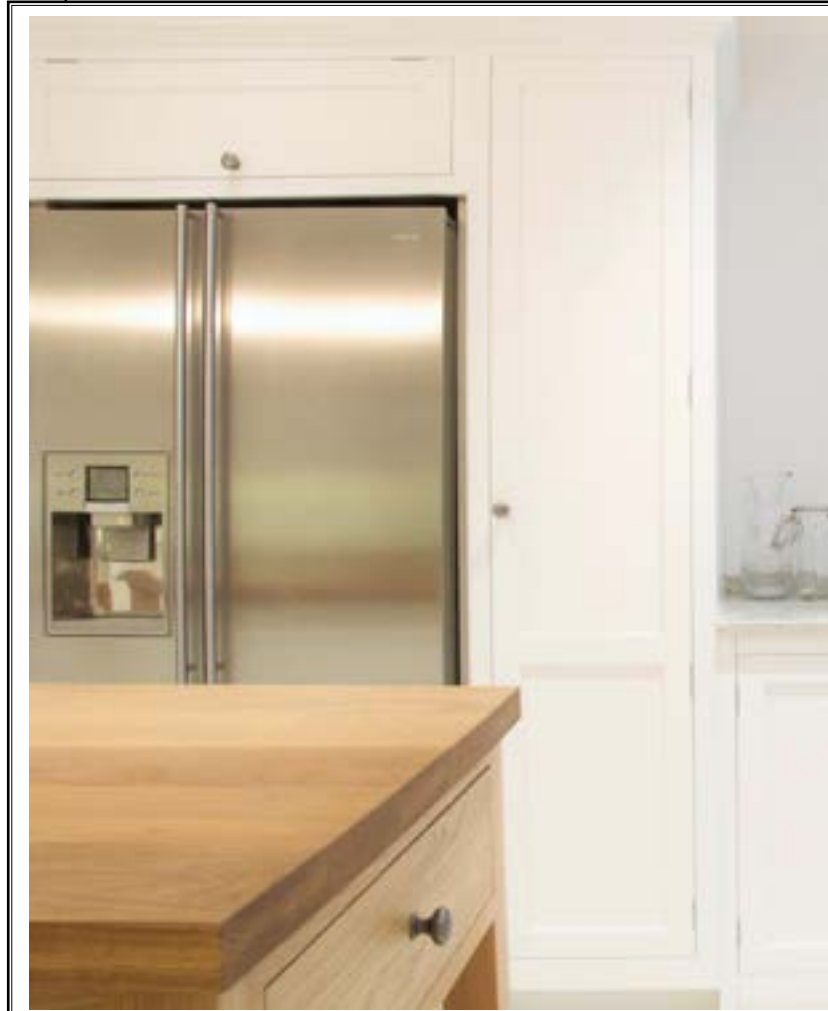

Mortised frames

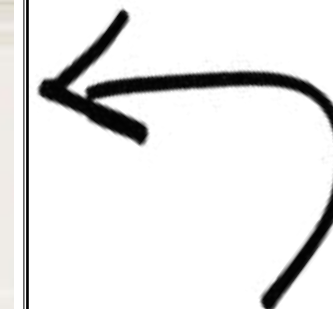

Dovetailed drawerboxes

## Lay on door design

Framed cabinets boast superior strength and durability similar to joinery around your home. By adopting time proven techniques to build your cabinetry it is by far the most effective way to ensure your furniture will stand the test of time.

Lay on cabinetry might not boast the same strength benefits as framed cabinets however to achieve a truly contemporary look it's the only way to go. By using melamine faced plywood carcasses the strength properties won't be too far behind

## Framed cabinetry

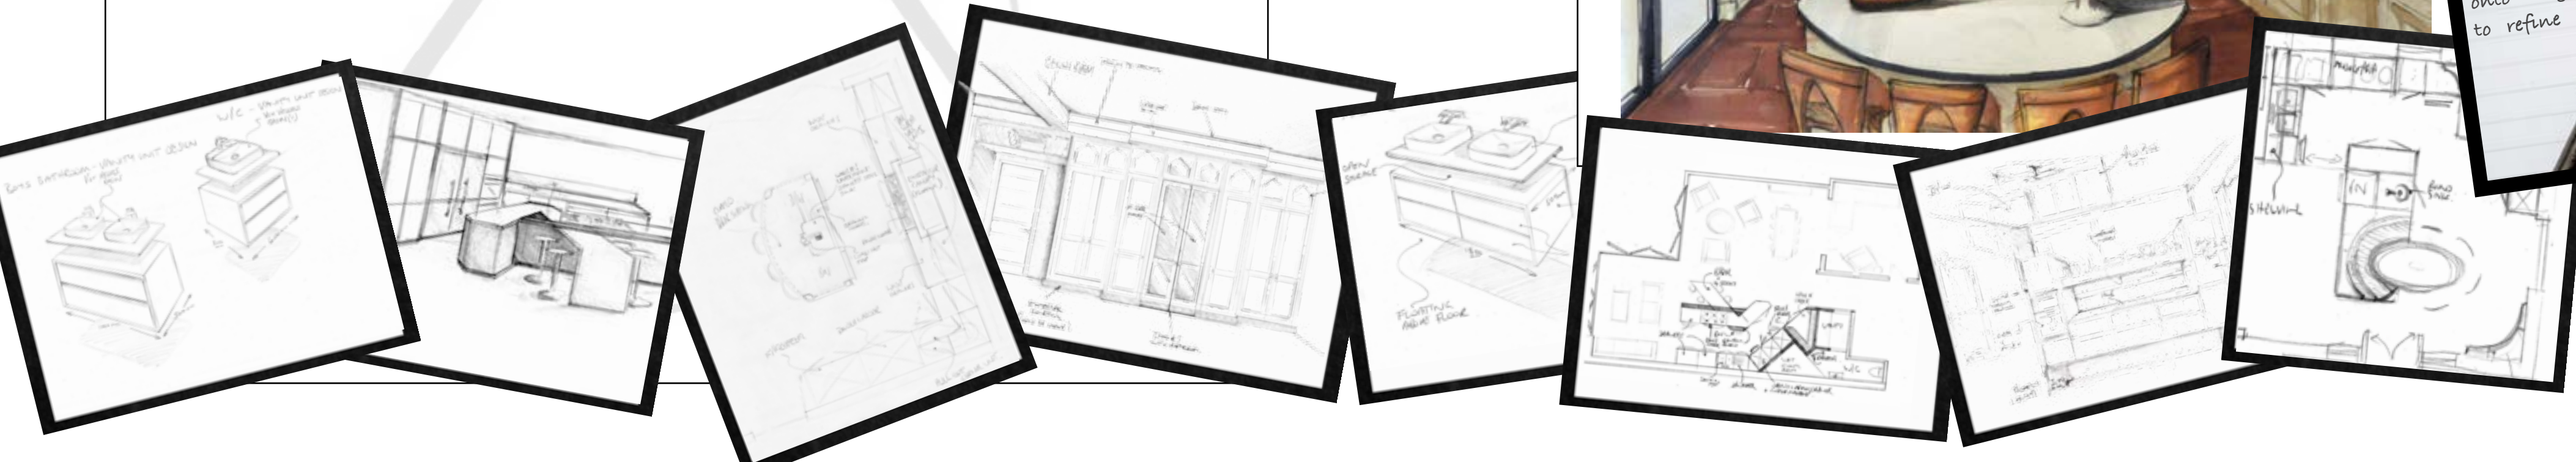

## Design Process

Layout planning and design sketching is fundamental to our service.

Whether we're designing your kitchen, bedroom, bathroom, office or one single piece of furniture, the initial design process always starts with a blank sheet of paper. It's essential to get the creative juices flowing and based on your brief and any inspiration you already have, we will create a hand drawn plan and perspective sketches that brings your space to life. This traditional technique gives us the freedom to explore all possibilities so that you feel sure that the design journey has led you to the best option for your project.

Hand drawn visuals quickly establish a direction for your project before moving onto digital software to refine your design.

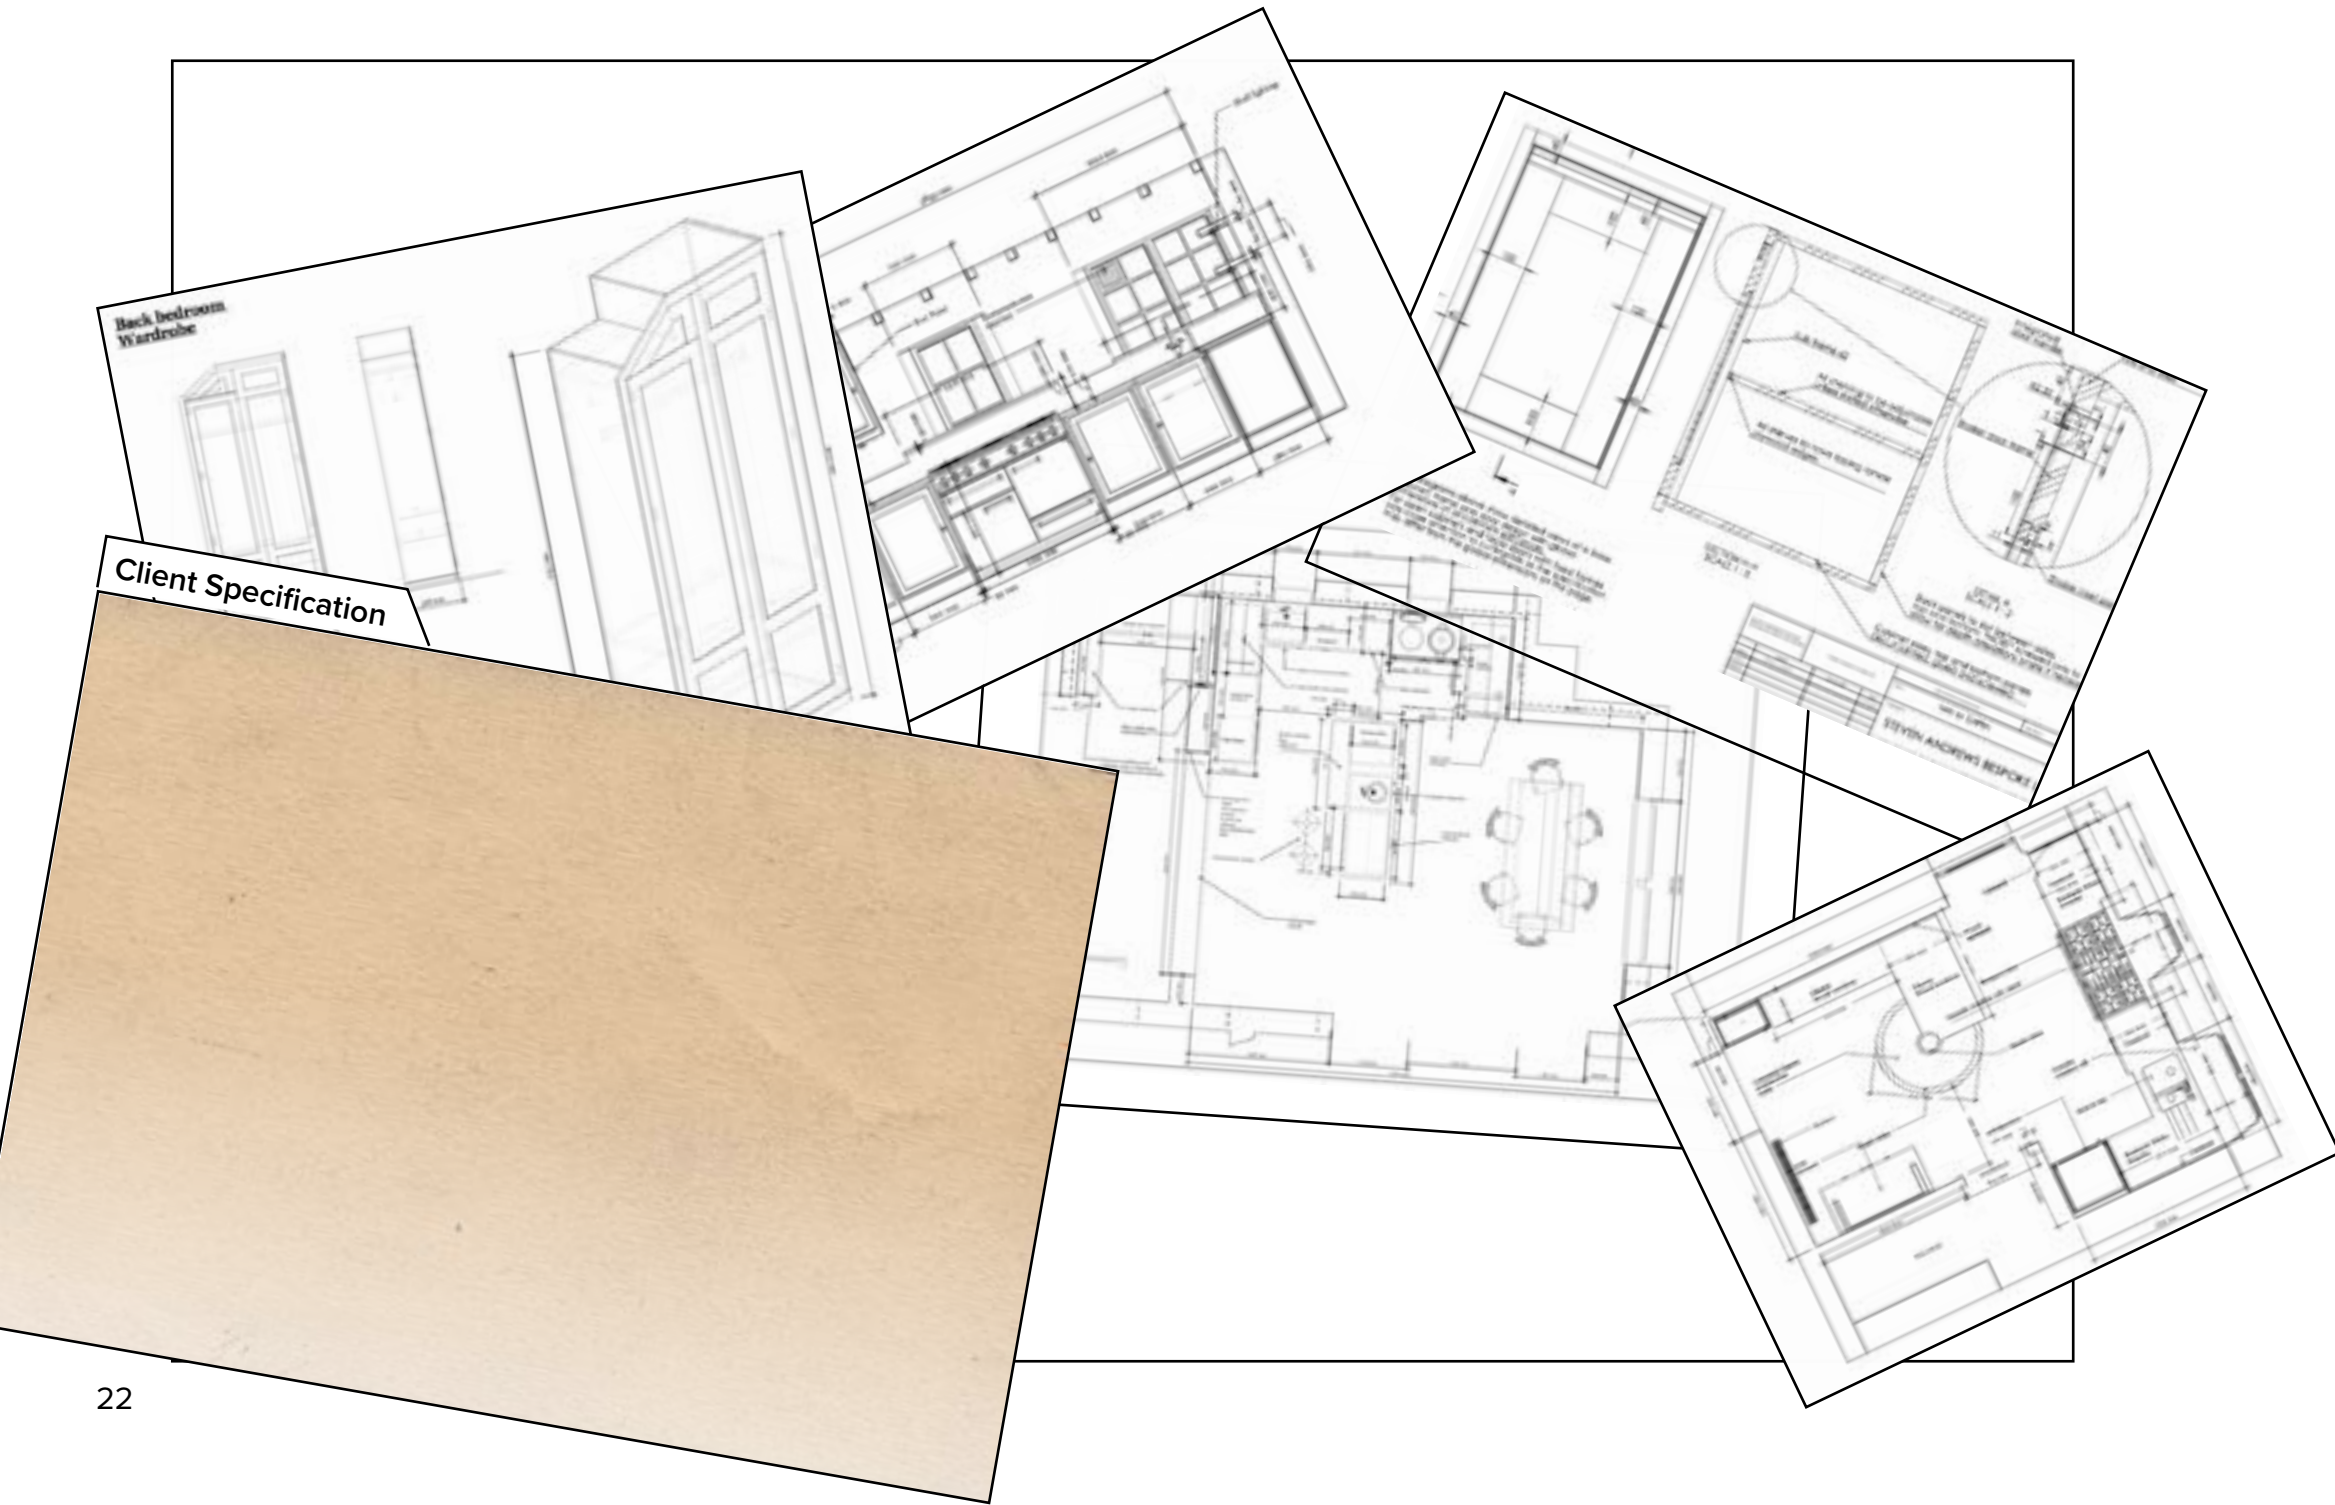

## Quoting

Cabinetry, fitting, finishing, appliances, accessories, and worktops are all supplied as part of Steven Andrews Bespoke service. We are however, happy to work with you in any capacity and will always do our best to be as competitive and as transparent possible. This is why we present all quotations in a detailed manner which ensures that you are in complete control of the budget.

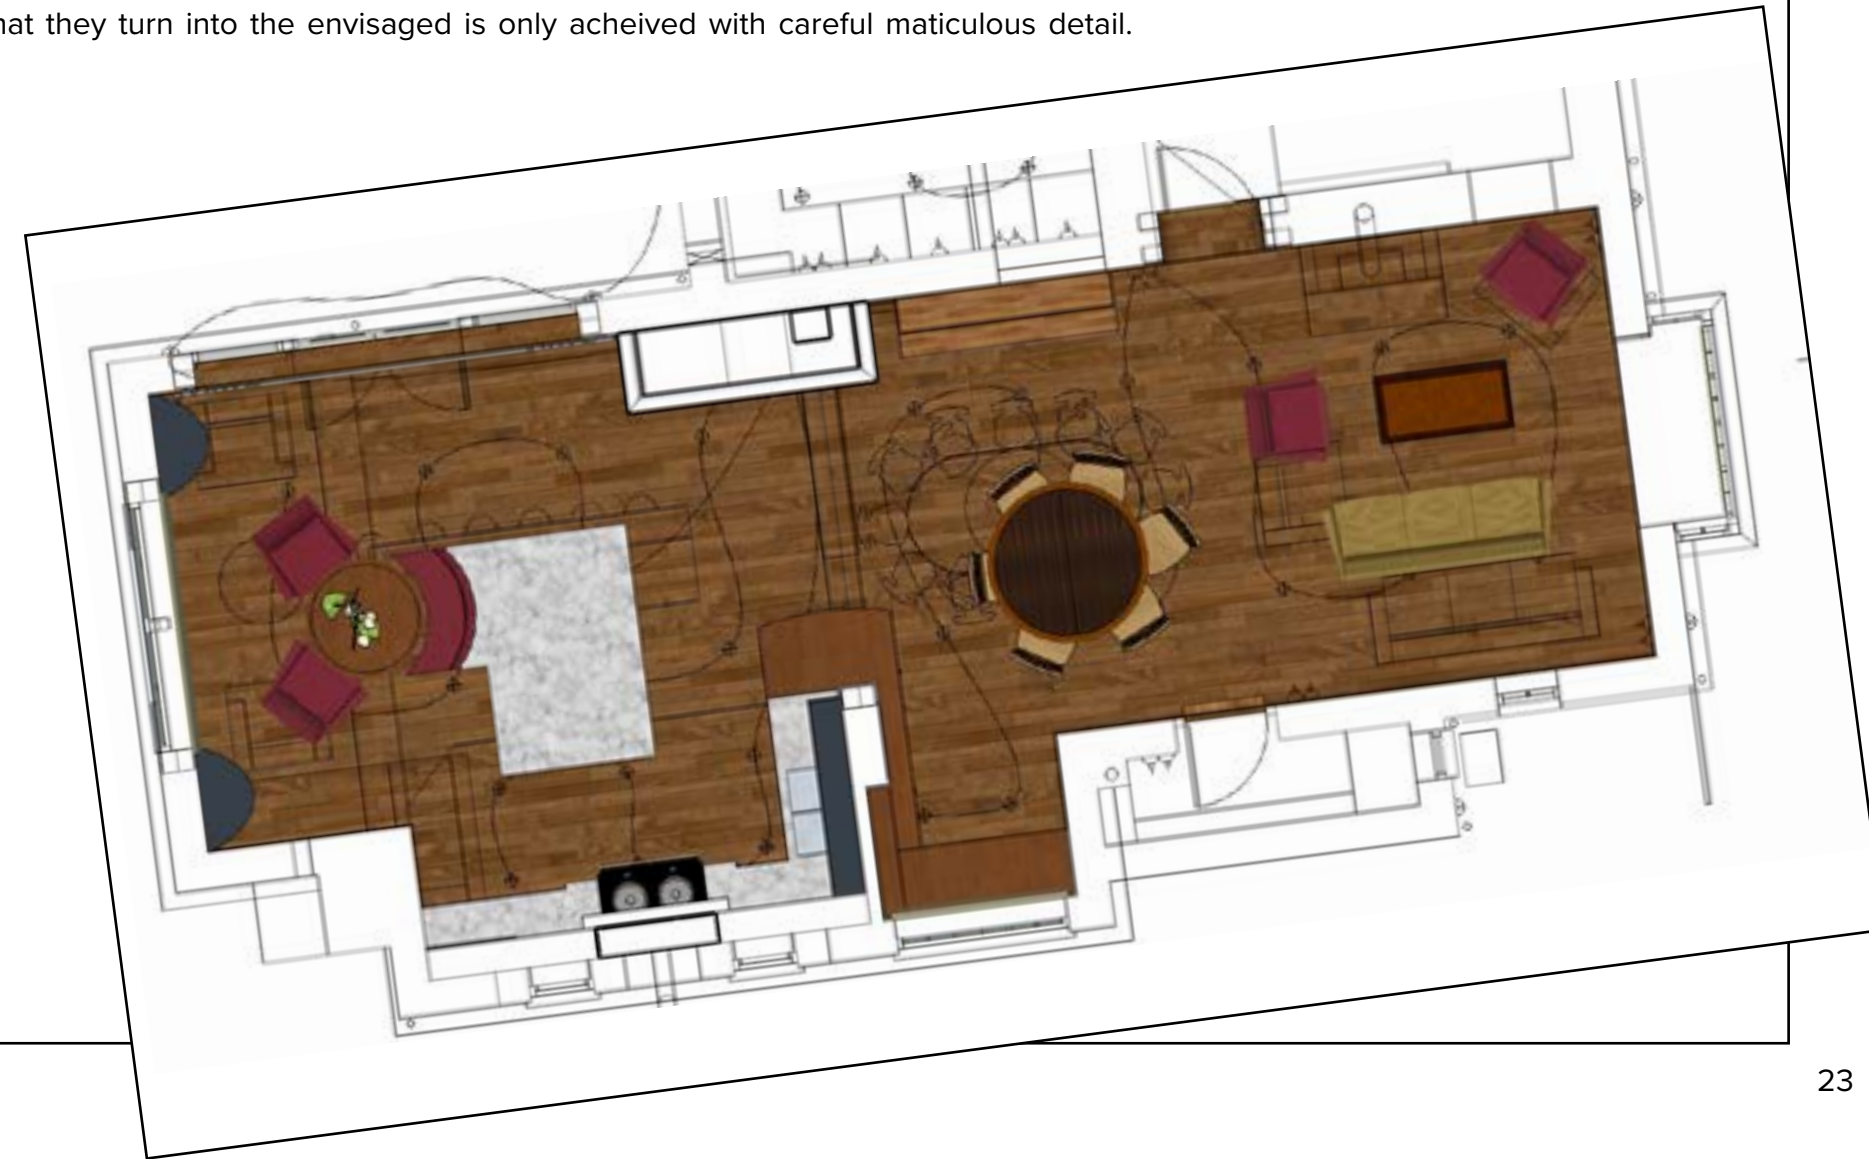

## Commissioning

Embarking on any home improvement project is a considerable investment of time and effort. At Steven Andrews Bespoke we are humbled with each and every new commission we receive and promise to guide you through every aspect of the final design process with continued attentiveness and flexibility throughout. Once commissioned we set out a timescale and lay plans to develop and finalise your detailed design visuals and drawings. This process can take time so it's never too early to set the wheels in motion, ensuring that enough time can be spent exploring every potential within your brief.

## Computer Aided Design

Accurately finalising your design is possibly the most crucial part of your project. Whilst sketchwork is the foundation of your ideas and concepts ensuring that they turn into the envisaged is only achieved with careful meticulous detail.

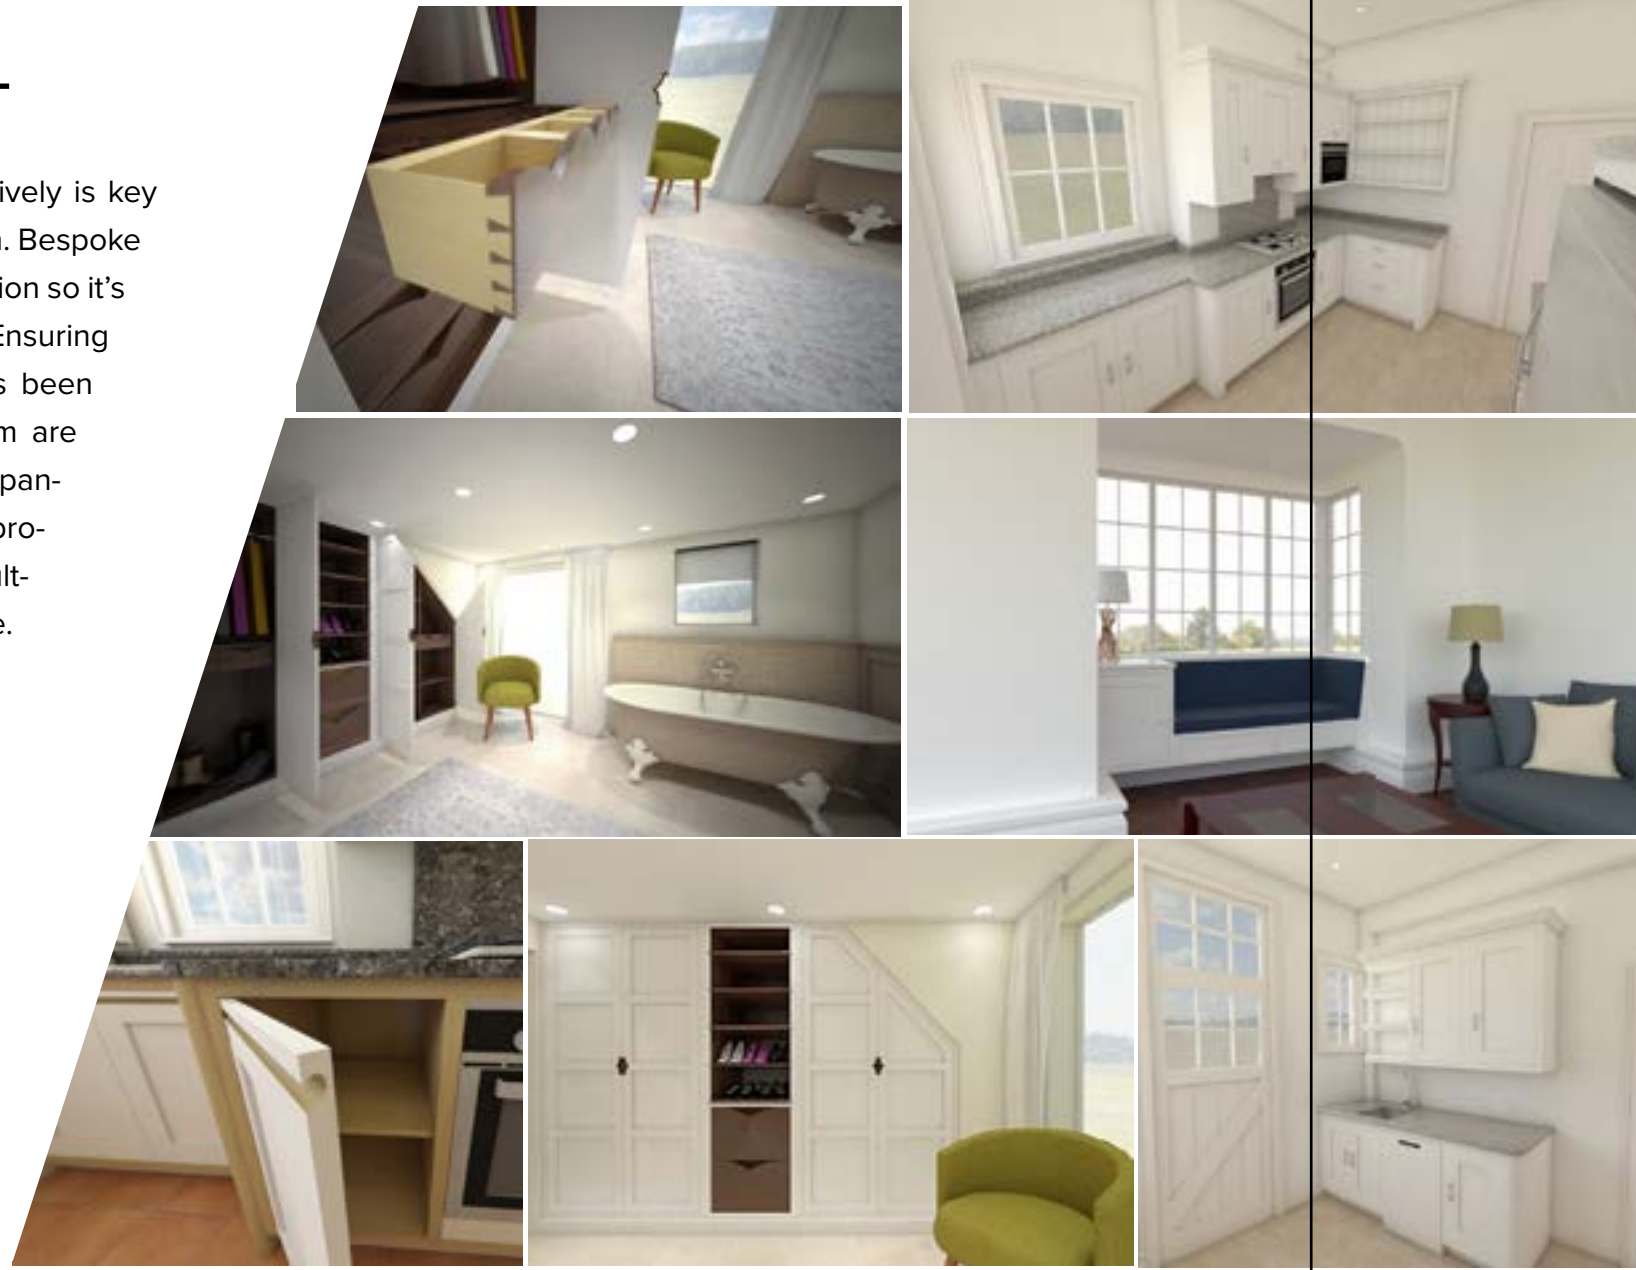

## Realistic visuals

Presenting concepts clearly and effectively is key to Steven Andrews Bespoke's approach. Bespoke concepts are always open to interpretation so it's very important that clarity is achieved. Ensuring that as the customer, your project has been interpreted correctly and that our team are working to fulfil your vision. Any discrepancies can easily be identified during this process ensuring completely that the resulting installation is exactly what you desire.

Our commitment to this is steadfast and we hope that you see the value in this too...

## Lead times

Manufacturing furniture to our exacting standards and to your expectations takes extreme care and attention to detail. Ample time must be allowed so that our talented cabinet makers can meticulously craft your furniture from start to finish. Typical projects can take between 3 - 6 months from commissioning to completion and some more elaborate projects even longer. However if you don't have the luxury of time we would certainly do everything we can to help achieve a timescale as close to yours as possible.

## Delivery & Installation

Quite possibly the most exciting part of the process, your furniture will be delivered and brought into your property by our specialist furniture courier, quickly followed by our installation experts. The installation process differs for all projects and clear scheduling will be provided to ensure timely completion of all necessary works.

## Project Management

To ensure we deliver the best service throughout your project we endeavour to manage any and all aspects being undertaken. Your project is unique and will inevitably have its own unique challenges so our project management is designed around you and your requirements with the aim of minimising any inconvenience caused by the installation process.

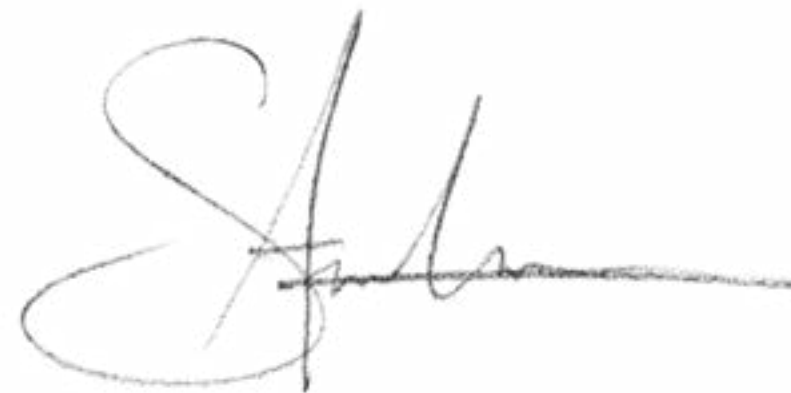

## Project Completion

We hope that at the end of your project that you have exactly what you'd hoped for (hopefully even more!) and that the process to get there has been enjoyable and the least disruptive as would ever be possible. We know that embarking on an interior refurbishment isn't always plain sailing and we have the knowledge the experience and the expertise to put all the pieces of your puzzle back in the right place.

We look forward to hearing from you soon
